LIM ZHI JIE SHAUN

HP: +65 91770915 Email: shaunlimzhijie@gmail.com

EDUCATION

National University of Singapore **Aug 2024 - May 2028**

BSc Business Analytics; Specialising in Machine Learning & Financial Analytics

- Relevant course work: Feature Engineering, Risk Analytics for Financial Services, Blockchains and Distributed Ledger Technologies, Application Systems Development for Business Analytics, Data Structures and Algorithms, Econometrics Modelling for Data Analytics, Computing Methodology, Data Management and Visualisation

TECHNICAL SKILLS

- Languages: Python, Java, SQL, R, C#, TypeScript, JavaScript, Solidity
- Backend: Django REST Framework(serializers and validation), REST API design, FastAPI, Uvicorn
- Frontend: HTML, CSS, JavaScript, React Native, Expo
- Data: PostgreSQL, Firebase, Tableau, model evaluation (ROC-AUC, F1-score), joins & CTEs

INDUSTRY EXPERIENCE

Product Management and AI Performance Intern, Central Provident Board Fund, Singapore **Jul 2026 - Present**

- Developed features and UI/UX improvements for an organisation-wide AI information and learning website, translating stakeholder requirements and user journeys into product specifications, frontend changes and bug fixes; authored user stories and conducted end-to-end testing and UAT for feature releases.
- Developed an AI Skills evaluation framework and guidebook covering skill triggering, instruction adherence, tool usage, output quality, and regression testing across different LLMs, agents, and testing and production harnesses.
- Contributed to the development of a company-wide AI Skills marketplace, designing platform-agnostic user journeys and approaches for evaluating, standardising, and distributing reusable AI Skills across enterprise AI platforms.

RELEVANT EXPERIENCE

Backend Developer—Django REST, PostgreSQL, Project Sa'bai, Singapore **Mar 2025 - Feb 2026**

- Built RESTful APIs (glasses fitting, vision screening, village configuration, authentication) with Django REST & PostgreSQL.
- Implemented validation & error handling; documented payloads for smooth Next.js integration in digital health missions.

Developer, SwipeSurvival, Singapore **May 2025 - Aug 2025**

- Developed a narrative-driven survival game (SwipeSurvival) in Unity with swipe-based choice mechanics, resource tracking, and branching storyline. Implemented Factory and Composite design patterns, integrated Audio Mixer with persistent user settings, and managed code through Unity DevOps.

Participant, TikTok TechJam Hackathon, Singapore **Aug 2025 - Aug 2025**

- Designed and implemented LLM evaluation framework for review moderation; optimised prompts with few-shot CoT reasoning and structured outputs, achieving perfect precision and recall for spam detection and macro F1 of 0.83 on real-world Google Maps data.
- Built metric dashboards (F1, precision, recall, confusion matrices), handled prompt parsing reliability with validation scripts, and reduced inference latency via batch processing.

Participant, NUS Datathon, Singapore **Feb 2025 - Feb 2025**

- Built and tuned a Random Forest model on real-world structured data at NUS Datathon 2025, achieving ROC–AUC of 0.949 and F1 of 0.90; engineered features and visualised feature importance to present actionable insights to judges.

LEADERSHIP EXPERIENCE

House Head, House Committee, CAPT Residential College **Mar 2025 - May 2026**

- Led 14-member team to plan welfare and large-scale house events for 100+ residents. Oversaw budgeting & OGL onboarding.

Captain, Computing Dodgeball and CAPT Dodgeball, NUS **Feb 2025 - Present**

- Led weekly training sessions and organised inter-house and inter-college games. Managed team logistics, scheduling, and equipment, growing participation and fostering a competitive team culture.
